Re: Notification of Defective Response mailed on 1-17-2006
US App. No. 10/531,324
Int. App. No. PCT/US03/34225
Title: Antiprotozoal Ring-Substituted Phospholipids
Inventor(s): Theodora Calogeropoulou et al
Docket No. MAK/102/PC/US

Dear Ms. Wallace,

The Notification of Defective Response mailed on 1-17-2006 asserts that the application lacks a "sequence listing" as well as an amendment directing entry of such sequence listing.

The above-referenced application is directed to chemical compounds and methods of use for the treatment of protozoal diseases. The above-referenced application does not contain a disclosure of nucleotide and/or amino acid sequences. Thus the above-referenced application is not required to contain any disclosure of nucleotide and/or amino acid sequences under 37 CFR §1.821.

Applicant respectfully traverses the requirement for a sequence listing and requests that it be withdrawn.

Respectfully,

James E. Piotrowski
Reg. No. 43,860
Attorney for Applicant
